Going to Pass Salesforce Administrator Exam? Learn More About Its Details and How Practice Tests Can Assist You

Our Friends · Thursday, August 6th, 2020

Once you start to understand how to use Salesforce apps, you may want to develop these skills. Then, you might also wish to verify them, and that is why it's necessary to know more about the Salesforce credentials.

Even though you have [Certbolt Website Here](#) using this platform, the accreditation will help you prove to any recruiter that your knowledge is rich and thorough as you've successfully managed a certification assessment.

In this article, we'll talk about the Salesforce Certified Administrator test and its associated badge because it is the beginning step that you can take on your path to becoming a competent professional in handling the Salesforce features. Now, are you curious to know how you can get started?

Steps You Need to Follow to Become Salesforce Administrator

If you want to become a Salesforce Administrator, first you should have about 6 months of practical experience with the Salesforce platform and know how to configure various options. This will serve as a base for understanding admin functions and creating solutions for improvement of business performance. The second stage is to pass an exam that has the code ADM-201. The registration fee for this test is [Salesforce Certification Training Courses](#). The local taxes will be added to this amount.

The Salesforce Administrator assessment includes 60 multiple-choice and multiple-select questions with different difficulty levels. Since you'll be given only 105 minutes to complete all of them, you have to be well-trained if you want to get the passing score which is 65%. The areas you'll be tested on are the following:

- Understanding the main concepts of organizational and user setup
- Providing the correct access and ensuring a high level of security
- Creating custom and standard objects
- Using marketing and sales Salesforce applications as well as ones dedicated to support, service, and AppExchange
- Providing data management and workflow automation
- Making different analytical reports and dashboards

- Administering desktops and mobiles
