How To Make Closure Wigs Look Natural in 2024

Our Friends · Friday, October 18th, 2024

Lots of ladies do not know that they can customize their closure wigs to look natural. **Closure wigs** have become increasingly popular, especially in women who want to protect their natural hair. Several wig bundles can be used with lace closures of different sizes including 2×4, 2×6, 4×4, 5×5, 6×6, 13×6, 13×4, 7×7, 8×5, etc.

Closure wig manufacturers aim to have a wig that blends in with the scalp perfectly, leaving no trace of being 'fake'. This can be achieved only when you use a human hair closure wig; the blend is beyond words.

This article will expose you to how to make your lace closure look more natural.

What Is a Closure Wig?

The 'closure' in a closure wig is primarily made of lace material which blends into the skin. The lace of these wigs is primarily made from Swiss lace, transparent lace, or hd lace. It is not designed like the frontal wigs which cover the whole head, rather most closures are found either at the center or side.

These wigs are so comfortable to wear and can be parted to any side of the face. This depends on the size of the closure purchased. Some of the most popular sizes have been mentioned above. A few of the lace closures come pre-plucked, highly ventilated, and with some strands of baby hairs in front ready for styling.

Tips On How to Make Closure Wigs Look More Natural

With the background information we now have on closure wigs, let's proceed to how we can make these wigs look more natural. These tips will open you up to all the possibilities you could consider when putting on a closure wig at your convenience.

Buy a Human Hair Wig

For an outstanding natural look, opt for a human hair wig. **Human hair wigs** are second to none compared with its counterpart the synthetic wigs, which cannot give off the natural vibe the human hair gives. The natural shine and feel of these wigs cannot be replicated in any other wig type.

So, buying a synthetic wig with a quality closure is somewhat of a waste of money and effort

because the overall look would still not be so natural. Save up some money, and add a human hair wig to your collection of goodness.

Select a Matching Closure Wig

Another vital tip to looking more natural with wigs is selecting a quality closure lace that blends in with your exact skin tone on the scalp. This is as crucial as selecting a good type of closure wig. Check out the various color shades and know your exact **skin tone** and body complexion.

In addition to this, select a style of closure wig that matches your natural hair. For example, if your natural hair is straight, opt for straight wigs. The same goes for tight curls, loose curls, and waves.

Customize Your Closure Wig

For individual preferences and styles, customize your closure wigs to suit your facial shape. Make

use of styling tools to achieve your desired view. Also carefully lay down your baby hairs to give your face better shape.

The goal of this customization is to ensure that after wearing your closure wigs, it looks as natural as possible. Customization of the closure wig also includes trimming of excess lace which should be done with small sharp scissors or a tweezer. Remember to leave a few inches of lace in front.

Proper Wig Installation

Anybody can install a closure wig because of its nature. All you need is constant practice and effort; the results will be awestruck. For both glueless and glued methods of installation, you have to be very careful during the whole process.

Once you can position it properly along the edges of the head from front to back, see to it that it is tightly placed and secured without a cause for fear of shifting or lifting during the day. For extra security, use pins, combs, and hair clips.

In the case of any difficulty and uncertainties, visit a professional hair stylist around you to guide you through the process of installation.

Blend Your Closure Wigs In

Now that the wigs are seated firmly on the scalp, go ahead and pick up your makeup concealer that is the exact shade of your skin. Use the tip of your makeup brush to take a little quantity and apply it generously on the lace in front and the partings. Finish up with some powder from your pallet.

At this stage, also focus on the knots that would require bleaching. These extra touch-ups create a natural, clean, and seamless appearance for your closure wig. You will love it!

Styling Pro Max

Hurray! Your closure wigs are ready to be styled. The versatility of these wigs allows them to be styled into various forms and patterns for every function, birthday, office wear, and casual wear.

Avoid over-styling especially with heat above 80°C. This will cause more harm than good. If you must use heat styling too, consider getting a high-quality heat protectant gel, cream, or spray. These products will prevent extra damage to your closure wigs. To prevent this from occurring, use low-medium heat. Accessorize your closure wigs if you prefer with headbands, fancy pins, and clips.

The Right Way to Maintain Your Closure Wigs

Follow the right path, and you'll be amazed at how gorgeous your wigs will become over the years. There are ladies out there who still do it the wrong way and are not aware of how to right their wrongs. This section will summarize the tricks you need to maintain your closure wigs, even at home.

Pamper and Care for it Regularly

This is important in keeping your closure wig in check for an extended time. Look out for any form of wear and tear that could limit the shine of these wigs. Avoid rough handling them to prevent

spot baldness.

Brushing Closure Wigs

Be careful when it comes to the Lace in front and try to work your way up there gently. With the head of a good brush or comb you can achieve this with minimal tension.

Purchase Quality Hair Products

When it comes to buying products, go for the best in terms of usage, reviews, ratings, and feedback from users. Spend some dollars on high-quality hair lotions, hair creams, hair serums, hair oils, and gels. The more quality your products are, the more moisturizing and softer the wigs will become. By doing so, it becomes easy to style your wigs into curls and waves.

Conclusion

We have different ways to make our closure wigs look more natural at our fingertips. Review this article over and over again and make the necessary corrections in your wig care routine.
